

# **MDIA 1189 – Darrell Chaddock – Assign 2**

For Assignment 2 I chose a WordPress theme called 'Costello'. My reason for choosing this theme was because it is designed as a platform for photographers. Photography is a hobby of mine.

The link to my WordPress site is <https://darrellchaddock.app>

The Costello theme was designed by Catch Themes. I installed two plugins made by Catch Themes to add more functionality to my website. The first of these plugins is Catch Gallery which, as the name suggests, enabled me to install a photo gallery on one page. The second plugin is called Catch Web Tools. If I had taken advantage of this second plugin I could have added more features that were beyond the scope of this project.

I also installed WPForms Lite so that I could have a contact form on my Contact page.
